

WHAT IS CLAIMED:

1. A single-use, delivery vehicle for the treatment of cutaneous warts,
comprising a solution of:
 - (a) cantharidin, in about .01% to about 20% by weight;
 - 5 (b) acetone; and
 - (c) flexible collodion.
2. The single-use, delivery vehicle of claim 1, the solution further
comprising podophyllin in about 1% to about 30% by weight.
3. The single-use, delivery vehicle of claim 1, wherein the cantharidin is
10 present at about .7% by weight.
4. The single-use, delivery vehicle of claim 1, the solution further
comprising salicylic acid at about 2% to about 45% by weight.
5. The single-use, delivery vehicle of claim 1, the solution further
comprising tincture of benzoin.
- 15 6. The single-use, delivery vehicle of claim 1, further comprising a
crushable ampoule with an absorbent, applicator tip.

7. A method of delivering wart-removing compositions to the skin, the composition being packaged in a single-use, crushable ampoule with an absorbent, applicator tip, comprising the steps of:

- 5 (a) crushing the ampoule, the ampoule containing a wart-removing composition; and
- (b) pressing the absorbent tip of the ampoule against the wart.

8. The method of claim 7, where the wart-removing composition further comprises a solution of cantharidin, acetone, and flexible collodion.

9. The method of claim 8, wherein the solution further comprises about
10 .01% to about 20% by weight cantharidin.

10. The method of claim 9, wherein the solution further comprises about .7% by weight cantharidin.

11. The method of claim 8, further comprising podophyllin.

12. The method of claim 11, wherein the solution further comprises about
15 1% to about 30% by weight podophyllin.

13. The method of claim 8, wherein the solution further comprises salicylic acid.

14. The method of claim 13, wherein the solution further comprises about 2% to about 45% by weight salicylic acid.

20 15. The method of claim 8, wherein the solution further comprises tincture of benzoin.
